# Industrial Feeding Managers Stewards, Chefs, Cooks

## ATTENTION, PLEASE!

July 3, 1944

### NUTRITION NEWS SERVICE

The attached News Service Bulletin has interesting information on Enriched Bread and suggestions for the use of Soya Products.

If you have questions about the enrichment of bread, here are the answers. (Notice the chart showing some of the important food values of slices of bread).

Industrial Feeders have found many uses for Soya Products. Besides the flour, grits and flakes, have you tried Canned Soy Beans ready for use? It is the immature Shelled Soy Bean, packed in salt and water, cooked ready for use, without points and comparatively inexpensive.

A later issue of the Industrial Feeding Bulletin will carry more information on new products such as quick-cooking frozen Soy Bean Sprouts. Watch for it!
